## Certificate of Testing

### Lipopolysaccharide from *Escherichia coli* O55:B5

Prod. No: 203A Lot Number: 20326B2

Date of Manufacture 24 June 2021 **FOR RESEARCH PURPOSES ONLY.  
NOT FOR HUMAN USE.**

#### Contents

Each container holds 2.5 mg of lyophilized lipopolysaccharide.

#### Reconstitution/Storage/Shipping Requirements

LPS is dispersible in aqueous solvents at concentrations of 1 mg/ml. To achieve a suspension in water, heating to about 50°C with intermittent vortexing or sonication is recommended. Allow ample time for dispersion to occur. The use of 0.5% triethylamine aids in dispersion. Triethylamine is very basic and may be neutralized with Tris-HCl to avoid hydrolysis of the LPS fatty acid chains.

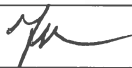

Store at 5 ± 3 °C. This product is provided as an aseptically packaged lyophilized powder, sealed under vacuum. Ship material at ambient temperature.

#### Handling

Good laboratory technique should be employed in the safe handling of this product. Wear appropriate laboratory attire including a lab coat, gloves and safety glasses.

The product is intended for research purposes by qualified personnel. It is not intended for use in humans or as a diagnostic agent. List Biological Laboratories, Inc. is not liable for any damages resulting from the misuse or handling of this product.

Attribute	Test Method ID/Version	Results
Appearance	Physical Appearance / ASSAY.063 v05	Before reconstitution: uniform white pellet. After reconstitution: clear, colorless, and particulate free.
Purity	SDS-PAGE / GELS.020 v07	Band migration pattern comparable to control
Potency	Endotoxin / ASSAY.092 v05	3.92 x 10 <sup>6</sup> EU/mg
Assay	Protein Assay / ASSAY.002 v05	0.5%
	Nucleic Acid Assay / ASSAY.003 v03	1.0%
	Phosphate Assay / ASSAY.004 v05	2.4%
	KDO Assay / ASSAY.005 v06	3.1%
