Job Title: Fermentation Associate (FA-SV)

Location: Campbell, CA

Job Duties: Work with strain preservations and fermentations for the manufacture of bacterial toxins, research reagents, live biotherapeutics, and cGMP fermentations. Work closely with other scientists in the Microbiology, Quality Assurance / Quality Control, and Production teams. Involved in the cultivation of aerobic and anaerobic organisms and preservation of microorganisms, including cryopreservation and lyophilization. Work on cGMP production, harvest, fill, and finish of microbial products. Perform tangential-flow filtration for concentration and diafiltration. Involved in the preparation of media and solutions. Follow, review, author, and document standard operation procedures on assigned projects. Participate in safety and regulatory compliance trainings. Contribute to hazardous waste collection and autoclaving programs. Document and input data as required.

Education and Experience: Bachelor's degree or foreign equivalent in Microbiology, Biology, Biotechnology, Chemical Engineering, or related field.

Salary Range: \$90,000 - \$130,000/year

Send resume to: E-mail resume to applicant@listlabs.com. Must reference job title and job code FA-SV in the subject line.
